MHAMMED ANOUAR SAIED

Riyadh, Saudi Arabia
+966506936321 | contact@anouarsed.com

PROFESSIONAL SUMMARY

Instrumentation Engineer with strong experience in laboratory testing, calibration, metrology, and quality management. Experienced in testing and calibration of safety valves and pressure instruments, measurement uncertainty evaluation, and technical reporting within ISO/IEC 17025 accredited laboratories. Strong knowledge of international standards and laboratory quality systems, with hands-on experience in equipment verification, internal audits, and continuous improvement. Detail-oriented professional with strong technical and analytical skills.

Experience

- **Precision Scientific Equipment PSE** 06/2026 - On going
  Calibration Engineer
  - Perform testing and calibration of safety valves, pressure instruments, and measurement equipment.
  - Calculate measurement uncertainty and evaluate the validity of test and calibration results.
  - Prepare, review, and validate technical reports and calibration certificates.
  - Ensure compliance of laboratory activities with ISO/IEC 17025 and applicable technical standards.
- **NOC Algeria** 2023 - 2026
  Laboratory Technical Responsibe
  - Manage and supervise laboratory testing activities in accordance with ISO IEC 17025.
  - Validate test results and approve technical reports.
  - Lead and coordinate laboratory teams ensuring technical competence.
  - Ensure compliance with quality, safety, and HSE requirements
- **Foraid group** 2020 - 2023
  Laboratory Technician
  - Performed hydrostatic and mechanical pressure testing on valves and oilfield equipment.
  - Conducted inspections in compliance with API RP standard.
  - Supported calibration and verification of pressure gauges and measurement instruments.

- Operated automated test benches (VENTIL, Metrus).
- Prepared technical reports and managed non-conformities (NCR).

Education

- Master’s Degree in Instrumentation — 2019
  Djilali Liabes University
- Bachelor’s Degree in Fundamental Electronics — 2017
  Djilali Liabes University

Core Competencies

- ISO/IEC 17025 Laboratory Compliance
- Measurement Uncertainty Evaluation (GUM Methodology)
- Metrological Traceability
- Internal Audit (ISO/IEC 17025)
- Accreditation Assessment Support
- API Standards
- Testing & Verification of Measuring Instruments
- Statistical Analysis & Quality Control
- Team Leadership
- HSE Compliance – Oil & Gas Facilities

Certificates

- ISO/IEC 17025 v 2017
- ISO 19011
- Uncertainty calculation and pressure
- Metrology applied to laboratories
- API RP 576
- API RP 527
- Industrial electricity
- Instrumentation and control
